Email: mohitagrawal250205@gmail.com

Mobile: +91-6377291643

SKILLS

Languages:	C++, Python, SQL, JavaScript
Web Technology:	HTML, CSS, React, Node.js
Libraries:	NumPy, Pandas, Scikit-learn
Tools/Platforms:	MySQL, Git, GitHub, Jupyter Notebook
Soft Skills:	Problem-Solving, Team Player, Adaptability, Communication

FREELANCING

Learnwithtanishq | Live

Oct '25 – Nov '25

- Developed a financial management platform focused on improving user spending habits through integrated trading tools, risk insights, and budgeting features.
- Implemented backend logic and APIs using Python and Node.js, enabling real-time analytics and seamless user workflows.
- Enhanced user decision-making efficiency by 40% by improving risk evaluation speed and interface responsiveness.

Tanix 2.0 | Live

Sep '25 – Oct '25

- Built a full-stack smart trading bot to process real-time market data and generate dynamic, multi-timeframe candlestick charts.
- Integrated Socket.IO and REST APIs to deliver TradingView-style visualizations and live binary trend predictions.
- Reduced data-to-decision latency by 45%, improving prediction responsiveness and overall trading performance.

PROJECTS

Crime Rate Prediction System | GitHub

May '25 – Jul '25

- Built a region-wise crime rate prediction model using historical and socio-economic data to uncover risk patterns and support data-driven insights.
- Performed in-depth Exploratory Data Analysis (EDA) to identify key trends and patterns, creating clear visualizations with Matplotlib and Seaborn.
- Trained, evaluated, and compared multiple ML models (Logistic Regression, Random Forest, XGBoost) to select the best-performing algorithm based on accuracy and robustness.

Tech: Python, Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn

AutoML Model Builder Platform | GitHub

Aug '25 – Nov '25

- Developed a web-based AutoML platform that allows users to upload datasets and automatically train machine learning models without writing code.
- Implemented automated data preprocessing pipelines including missing value handling, feature encoding, scaling, and train-test splitting.
- Built an automated model selection system comparing algorithms such as Logistic Regression, Random Forest, and XGBoost.

Tech: Python, Flask / FastAPI, React.js, Pandas, MongoDB, XGBoost

TRAINING

Logic Building, Programming and Data Structures

Jun '25 – Jul '25

- Completed structured training covering arrays, linked lists, stacks, queues, trees, graphs, and hashing.
- Strengthened algorithmic problem-solving skills through implementation of searching, sorting, recursion, and dynamic programming techniques.

CERTIFICATION

- | | |
|---|---------|
| Build Generative AI Apps and Solutions with No-Code Tools Infosys Springboard | Aug '25 |
| Computational Theory: Language Principle & Finite Automata Theory Infosys Springboard | Aug '25 |

EDUCATION

- | | |
|--|---------------------------|
| Lovely Professional University | Punjab, India |
| Bachelor of Technology - Computer Science and Engineering; CGPA: 7.35 | Since August 2023 |
| MDS Public School | Sawai Madhopur, Rajasthan |
| Intermediate; Percentage: 70% | Apr '21 – Mar '23 |
| Alpine Vidyapeeth Public School | Sawai Madhopur, Rajasthan |
| Matriculation; Percentage: 93% | Apr '19 – Mar '21 |
